Passing year:- 2023

Stream:- MCA

Submitted to Testvagrant Technologies.

Code is written in c++ language and it is below:-

```
#include <iostream>
#include <map>
using namespace std;

class EvaluatePrice {
    map<string, int> price = {{ "Leather wallet", 1100}, {"Umbrella", 900}, {"cigrate", 200}, {"Honey", 100}};
    map<string, int> gst = {{ "Leather wallet", 18}, {"Umbrella", 12}, {"cigratte", 28}, {"Honey", 0}};
    map<string, int> quantity = {{ "Leather wallet", 1}, {"Umbrella", 2}, {"cigratte", 3}, {"Honey", 4}};
    int maxGst = 0;
    string nameOfMaxGst = "";
public:
    void insertItem(string name, int unitPrice, int gs, int qt) {
        price[name] = unitPrice;
        gst[name] = gs;
        quantity[name] = qt;
    }

    int getPrice() {
        int tot = 0;
        for(auto i: price) {
            int currPrice = price[i.first]*quantity[i.first];
```

```

        int dis = 0;
        if(price[i.first] > 500) {
            dis = (5*price[i.first])*100;
        }
        int currgst = (gst[i.first]*currPrice)/100;
        if(currgst > maxGst) {
            maxGst = currgst;
            nameOfMaxGst = i.first;
        }
        tot+= (currPrice+dis+currgst);
    }
    return tot;
}

string getMaxGstName() {
    return nameOfMaxGst;
}

};

int main()
{
    EvaluatePrice obj;

    cout<<"Total Price of all product is :- "<<obj.getPrice()<<"\n";
    cout<<"maximum GST paid "<<obj.getMaxGstName()<<"\n";

    return 0;
}

```
